

DIPAK KHANDAGALE

AI Engineer | Machine Learning | Computer Vision | LLM Evaluation

Pune, India | khandagaledipak47@gmail.com | +91 8390139357 | <https://www.linkedin.com/in/dipakkhandagale/> | <https://github.com/Dipakk7>

SUMMARY

AI Engineer with hands-on experience in Machine Learning, Computer Vision, and AI-driven application development. Skilled in Python, TensorFlow, FastAPI, SQL, and data analysis, with experience building and deploying intelligent systems for image and video processing. Contributed to AI model testing, prompt evaluation, data validation, and workflow assessment during internship experience. Strong analytical and problem-solving abilities with a passion for developing reliable AI solutions, improving data quality, and supporting next-generation AI systems.

EDUCATION

Bachelor of Technology (B.Tech) – Artificial Intelligence and Data Science

MIT College of Engineering, Chh. Sambhajinagar | Nov 2022 – July 2026

Relevant Coursework: Machine Learning, Database Management Systems, Statistics for Data Science, Data Visualization

PROFESSIONAL EXPERIENCE

AI Intern | RaiTalk | Jan 2026 – May 2026

- Evaluated 50+ prompt variations to improve AI response quality, consistency, and reduce failure cases.
- Performed AI output testing and workflow validation across multiple use cases to ensure reliable model performance.
- Supported API integration testing and identified issues affecting response accuracy and stability.
- Documented experimental findings, test results, and improvement recommendations to support product development and model refinement.
- Collaborated with team members to analyze AI-generated outputs and maintain quality standards across testing workflows.

TECHNICAL SKILLS

Programming: Python, SQL, MySQL

Data Analysis & Validation: Pandas, NumPy, Exploratory Data Analysis (EDA), Data Cleaning, Data Validation

Machine Learning & AI: Scikit-learn, TensorFlow, Machine Learning, Computer Vision

Visualization: Matplotlib, Seaborn, Power BI, Excel

Deployment & APIs: FastAPI, REST APIs, API Testing

Tools & Technologies: Git, GitHub

TECHNICAL & ANALYTICS PROJECTS

1. Deepfake Video Detection | Python, TensorFlow, FastAPI

- Developed a deep learning-based deepfake detection system using ResNet50 and LSTM architectures for video classification.
- Trained and evaluated the model on 10,000+ video samples, achieving 85% precision in identifying manipulated content.
- Performed data preprocessing, feature extraction, and model validation to improve detection performance.
- Deployed the solution using FastAPI for real-time inference and testing.
- Reduced manual verification efforts by automating video authenticity assessment workflows.

2. Real-Time Face Recognition Attendance System | Python, OpenCV, YOLO

- Developed an AI-powered attendance system using computer vision and facial recognition techniques.
- Implemented real-time face detection and recognition for 50+ registered users with low-latency performance.
- Automated attendance logging through FastAPI and SQLite integration.
- Performed image processing and model testing to improve recognition accuracy and reliability.
- Reduced manual attendance errors and improved record management efficiency.

3. E-commerce Sales Analysis | Python, SQL, Power BI

- Analyzed 15,000+ sales records to identify customer behavior patterns and regional performance trends.
- Performed data cleaning, exploratory data analysis (EDA), and SQL-based querying to extract actionable business insights.
- Developed interactive Power BI dashboards for revenue, customer segmentation, and product performance analysis.
- Identified top-performing products contributing 70% of total revenue and provided data-driven recommendations for business optimization.

CERTIFICATIONS

- AI Foundations Associate – Oracle (2025)
- Generative AI Professional – Oracle (2025)
- Multicloud Architect Professional – Oracle (2025)
- Crash Course on Python – Coursera (2024)
